Pitch Deck and Video

CHIA JIN YI
Universiti Malaya
Fronted and UI/UX

THE PROBLEM

Students enter a workforce evolving faster than their syllabus

56% of professionals already use AI tools in production tasks

Only 26% have received structured or formal institutional training

Over 600,000 workers will require transition pathways in 3–5 years

WHY CURRENT TOOLS FALL SHORT

Today Only

Tools focus on current employability, not how careers evolve with AI

No Evidence

Matches rarely explain why a role fits, and AI resumes can invent achievements

Static Plans

Learning advice stays static while labour-market conditions keep changing

PROPOSED SOLUTION

One journey from self-discovery to career readiness

Understand Me

- Capture skills, experience & interests

→

Future Skills Radar

- Explore labour-market and AI trend signals

→

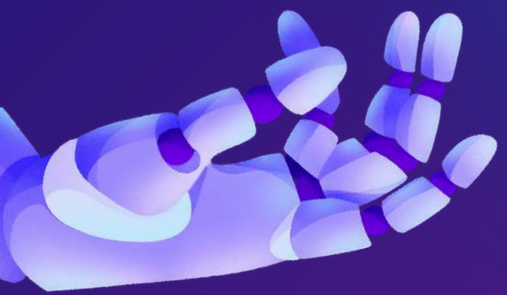

Role Matching

- See best-fit roles, strengths & gaps

→

Skill Roadmap

- Get a next-step plan plus SDG alignment

OUR TARGET USERS

Primary Users

UNIVERSITY STUDENTS

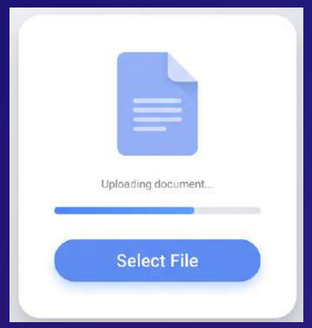

Secondary Users

EARLY-CAREER PROFESSIONALS

HOW IT WORKS?

01 02 03 04 05 06 07

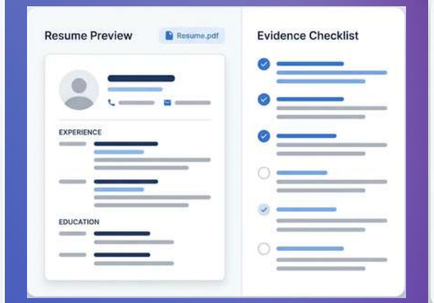

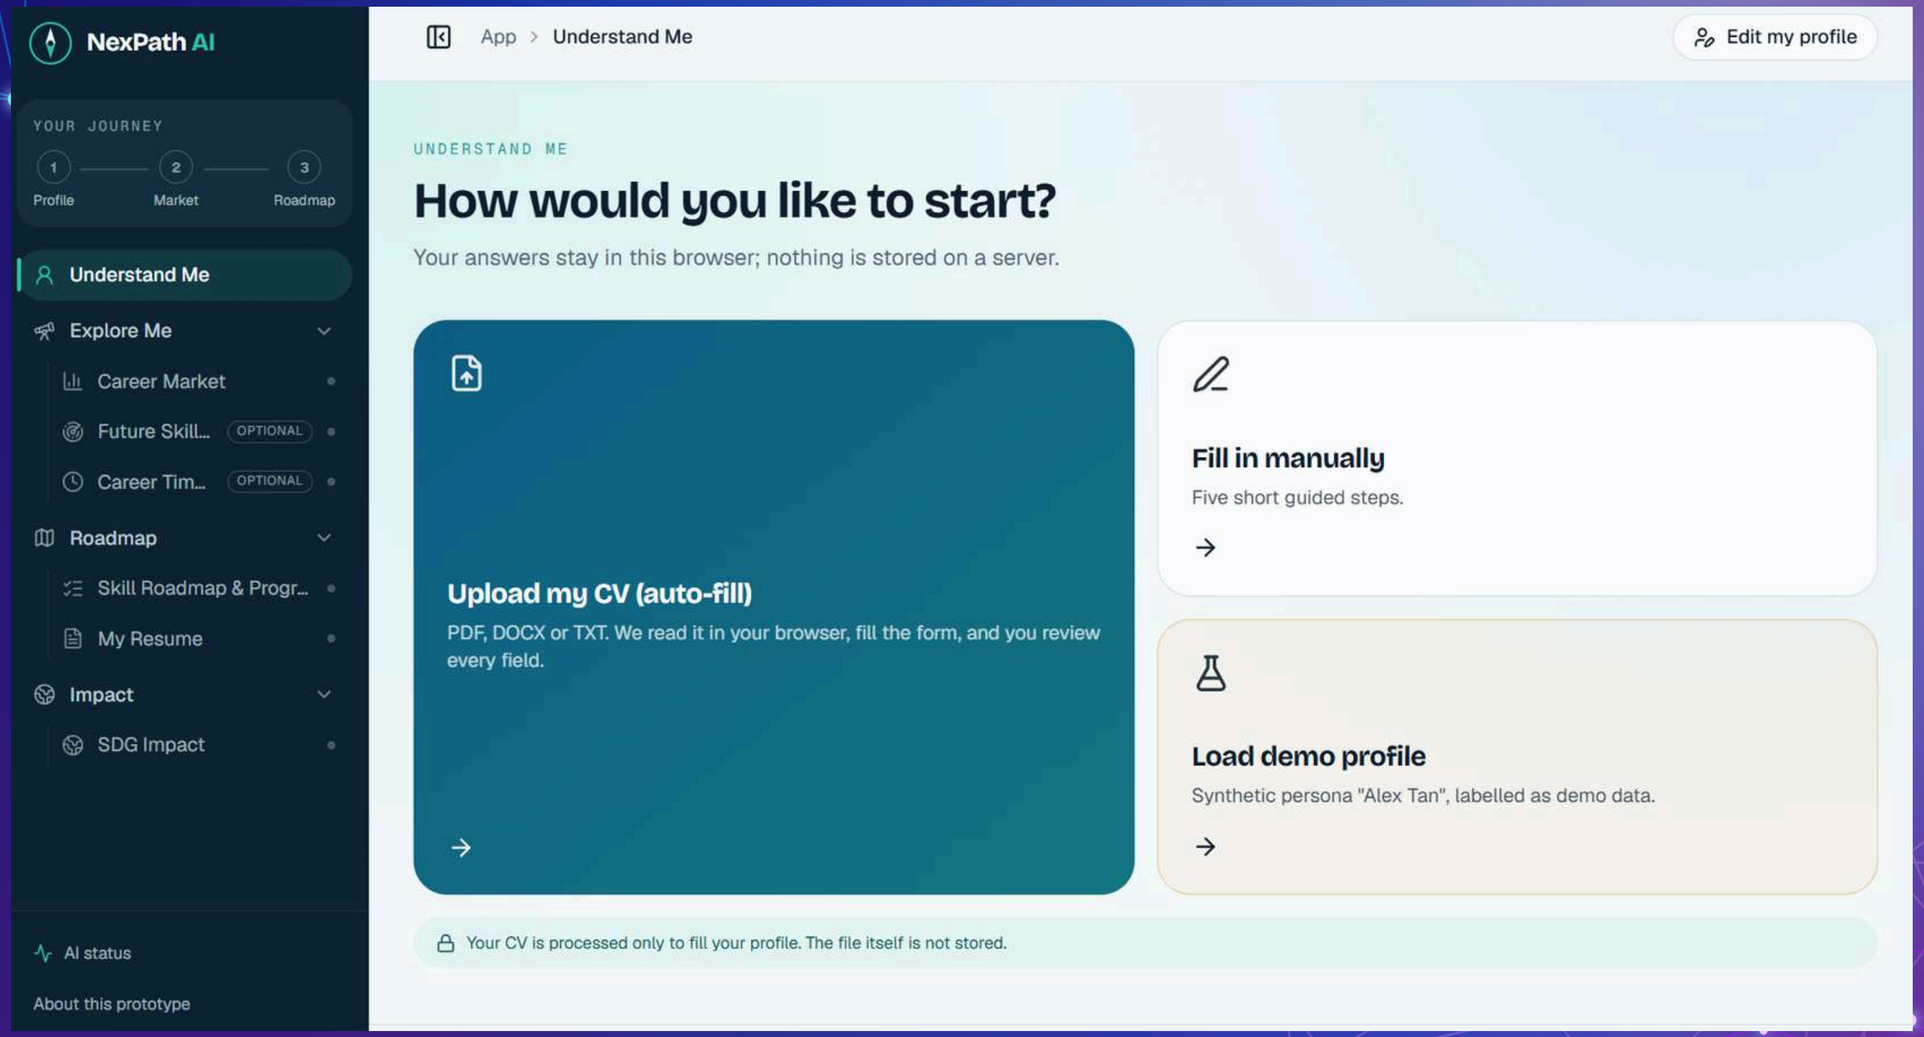

Upload CV / Survey → Profile Summary → Career Matching → Compare AI Futures → Learning Roadmap → Built Resume → SDG Impact

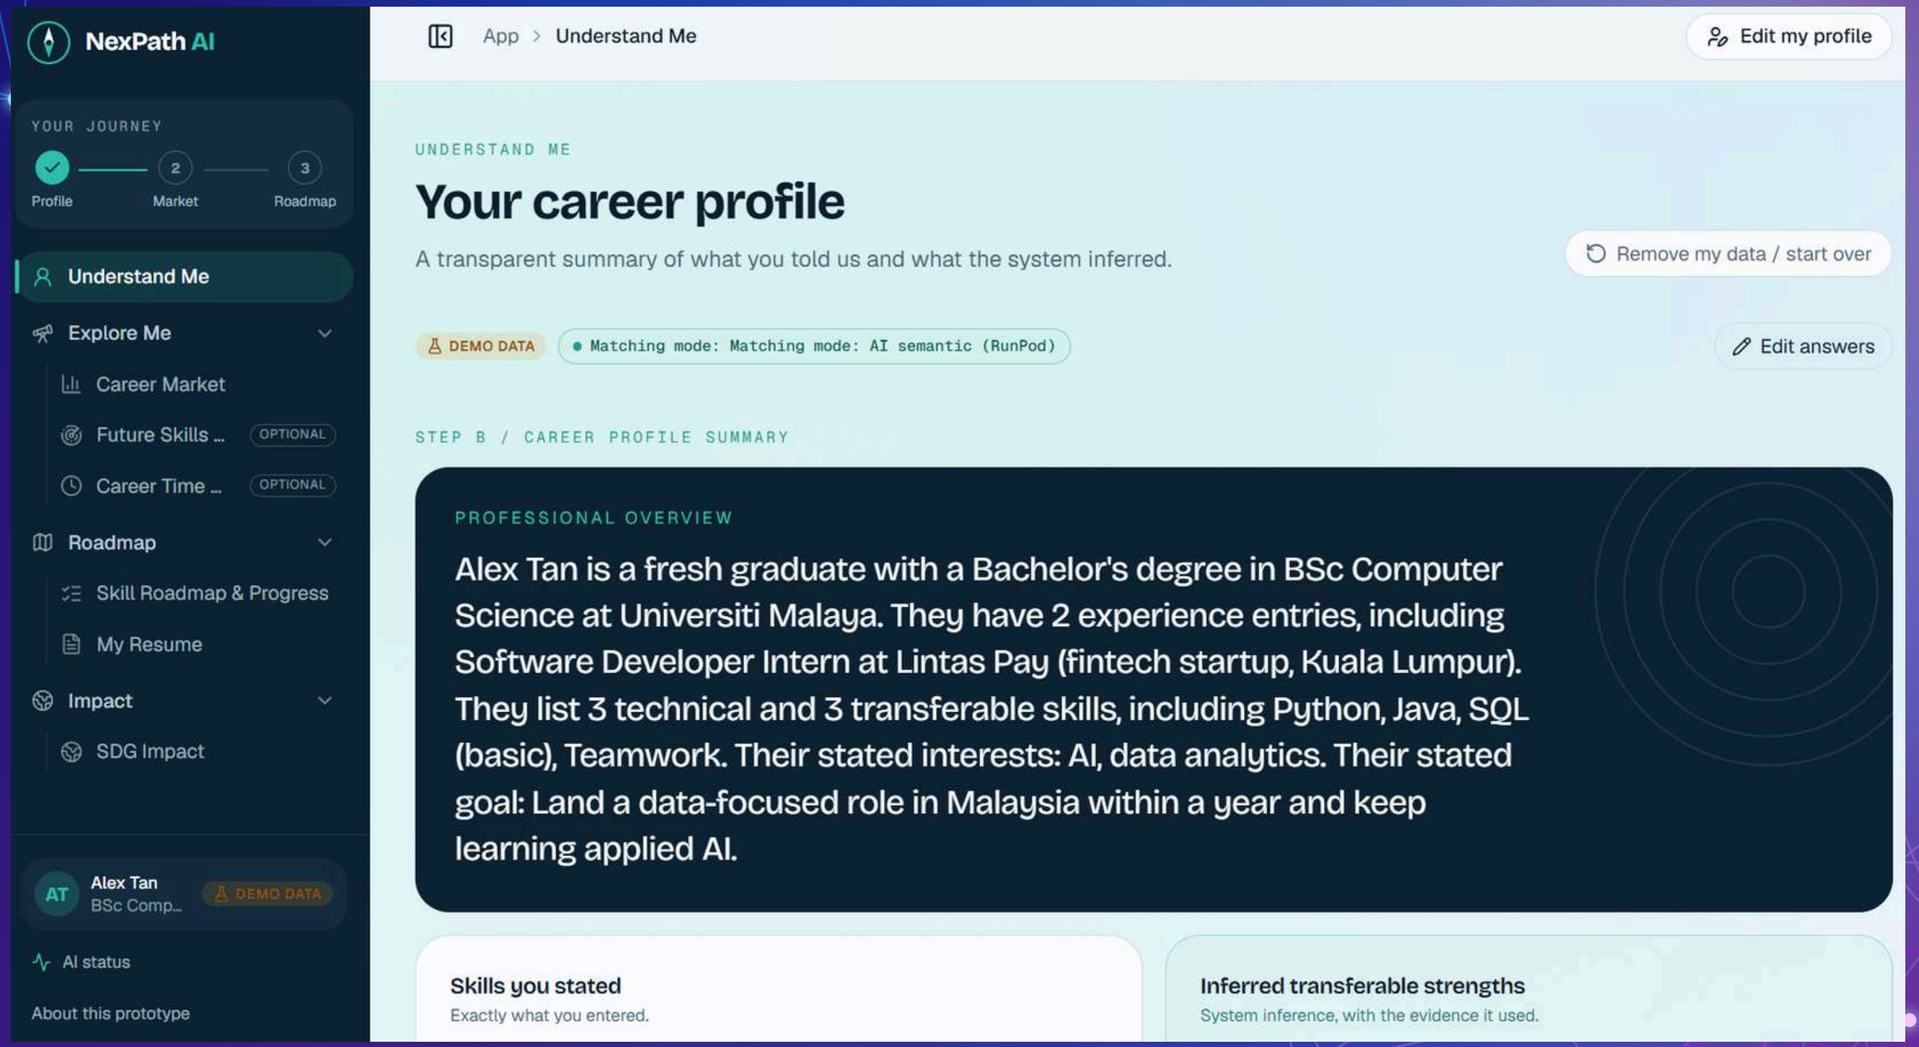

PROTOTYPE

STEP 1: Profile Intake: the user stay in control

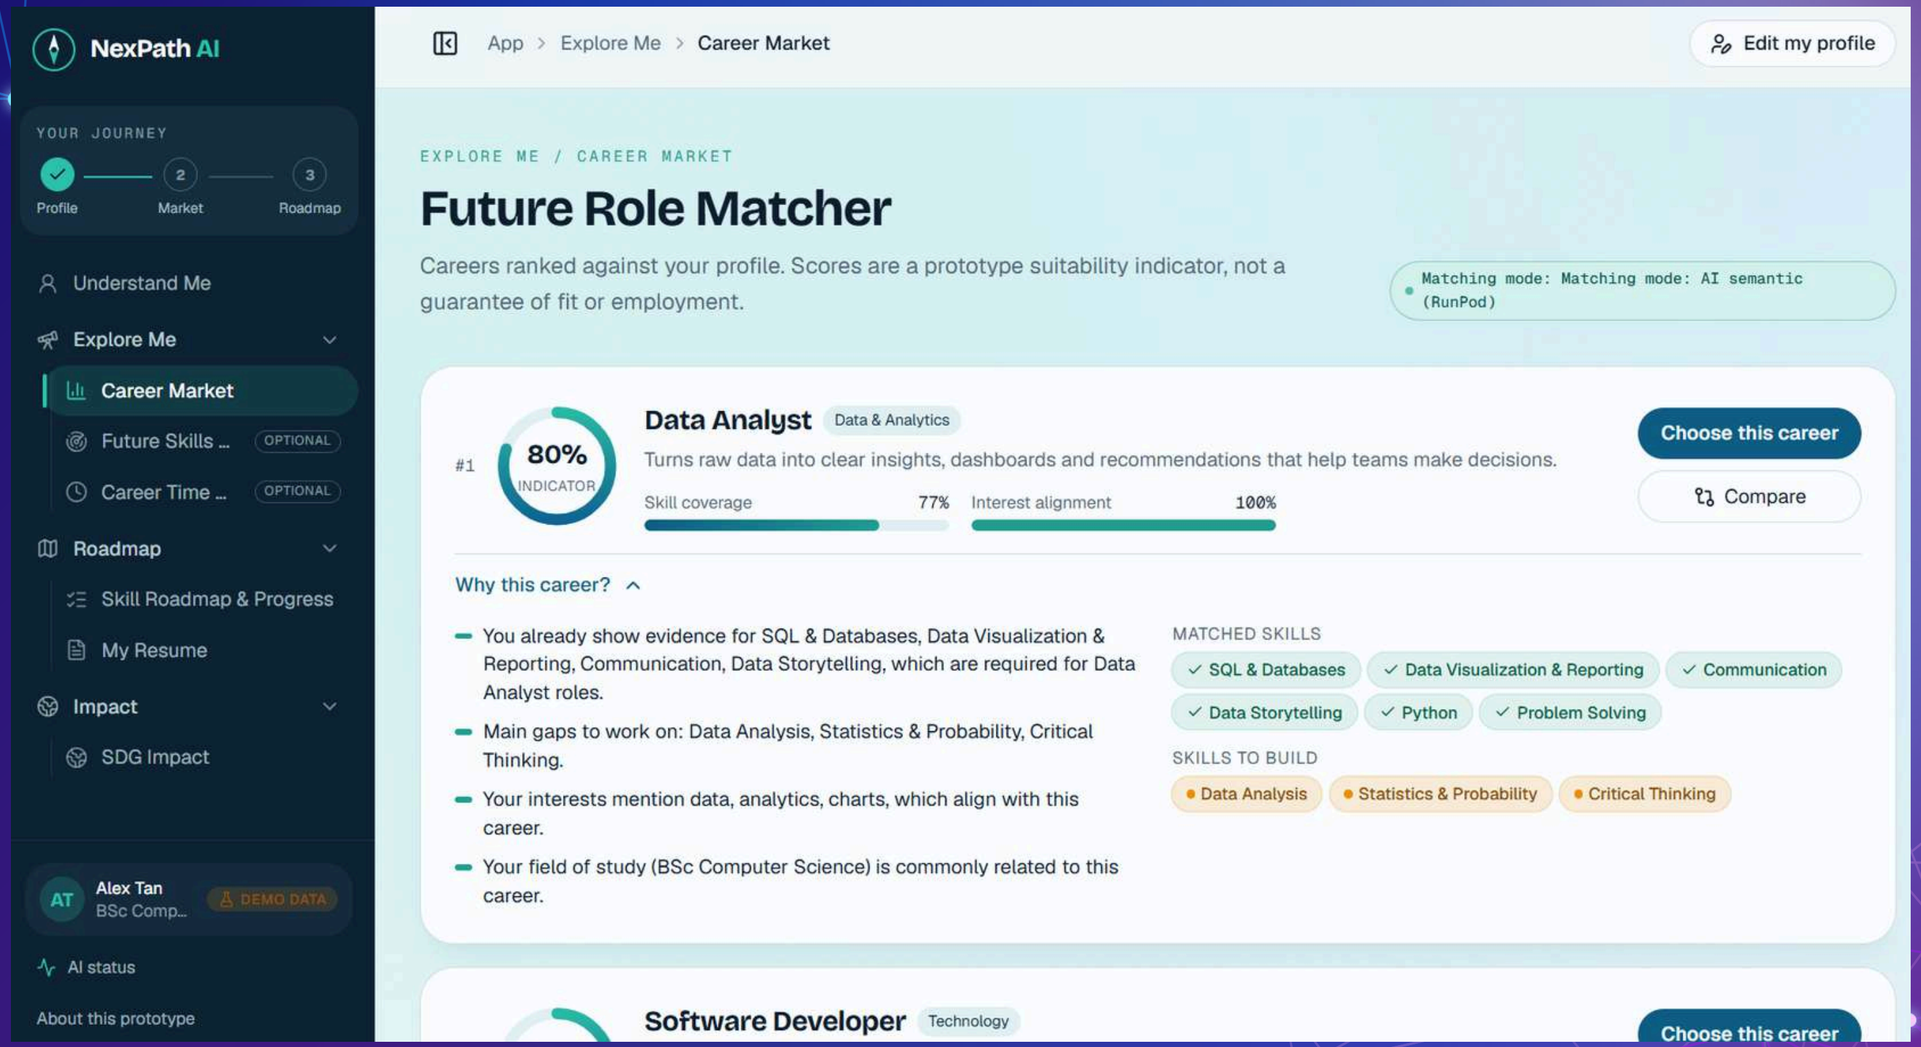

PROTOTYPE

STEP 2: Profile Summary - build your own career profile

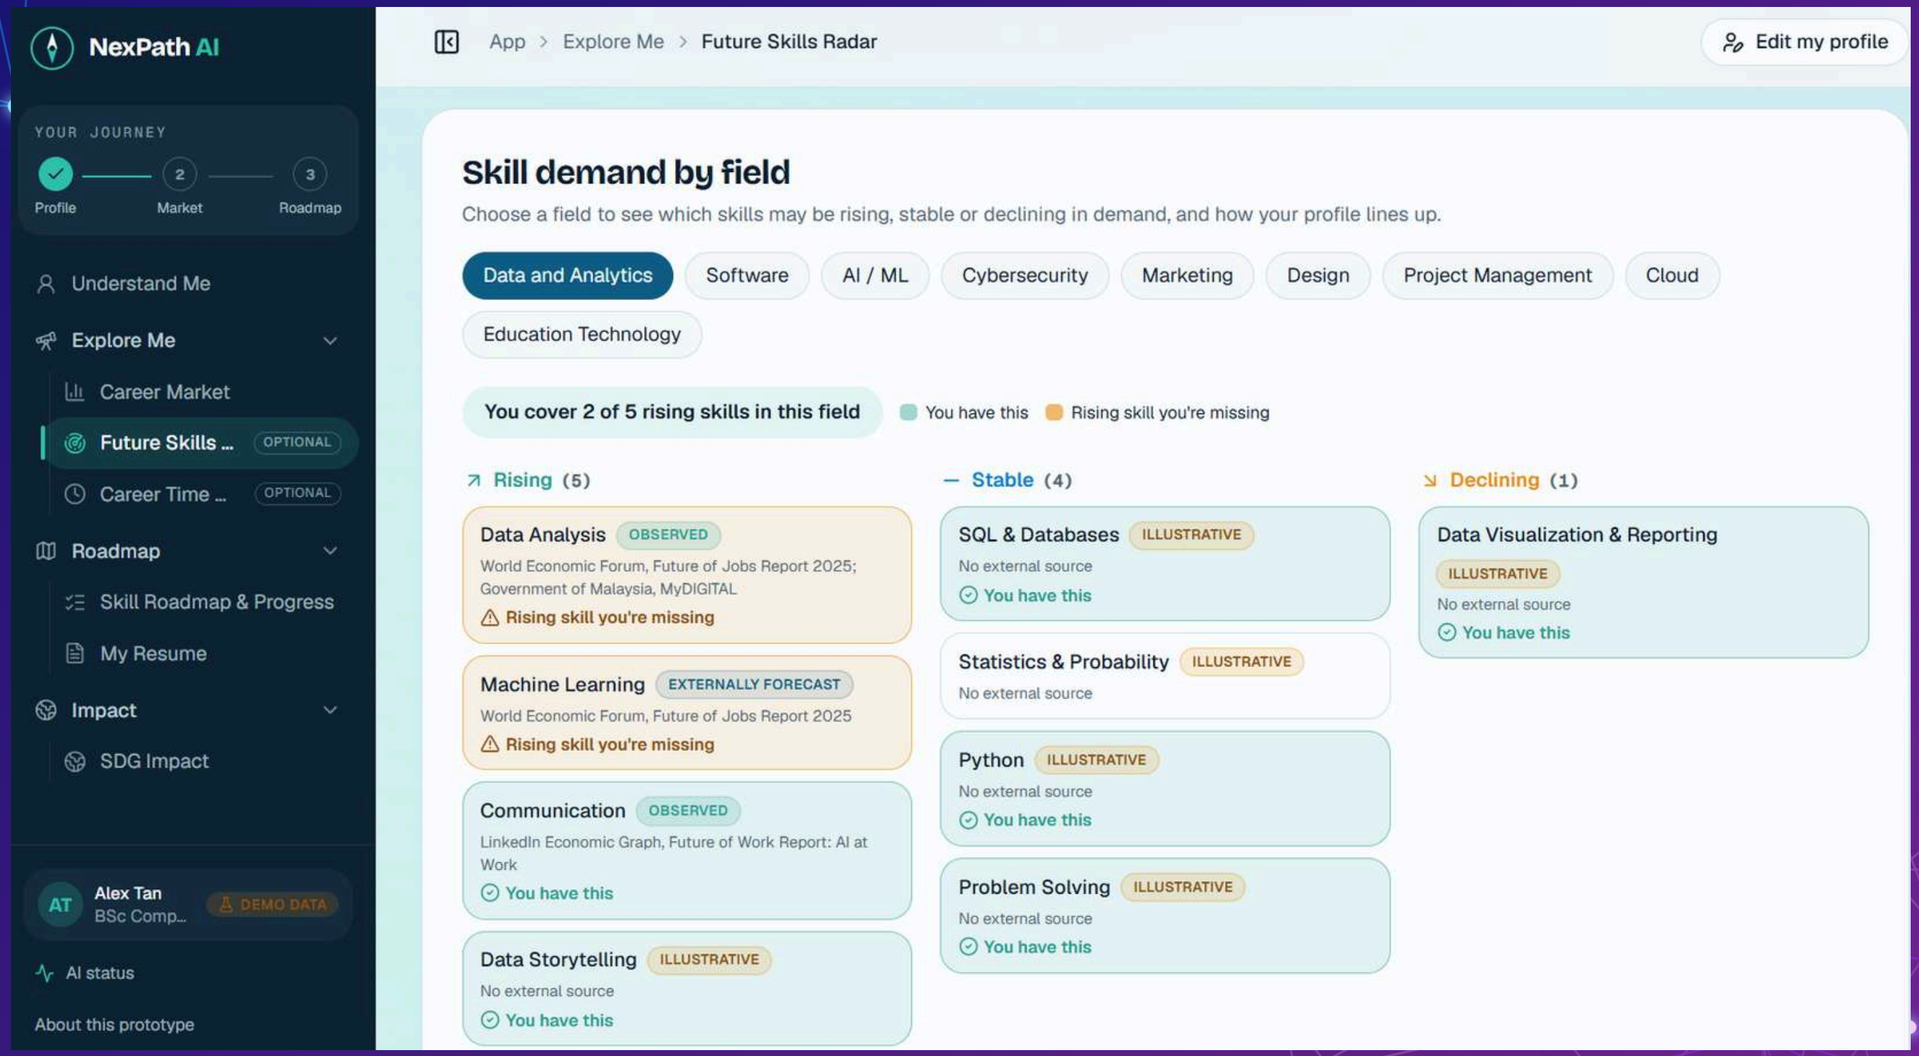

PROTOTYPE

STEP 3: Future-Role Matching - a score you can explain

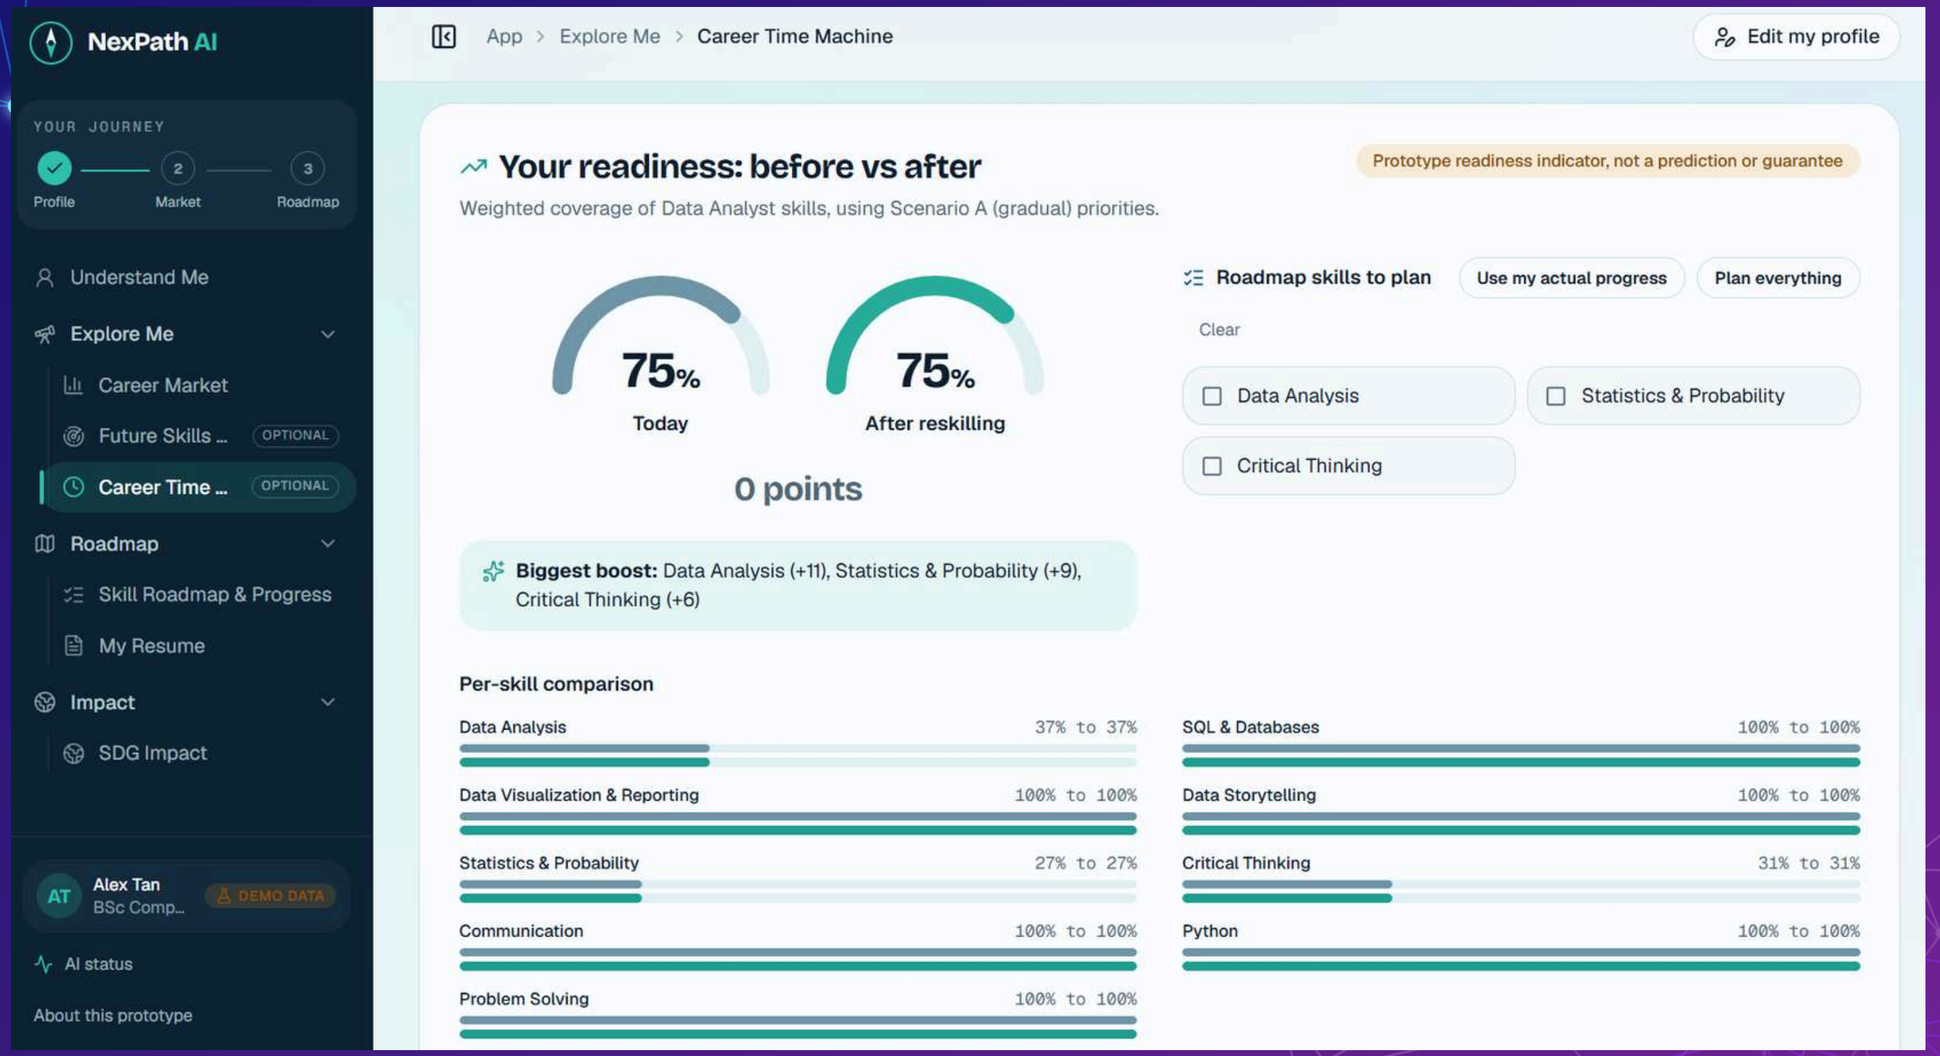

PROTOTYPE

STEP 4: Future Skill Radar - every signal has a source and a date

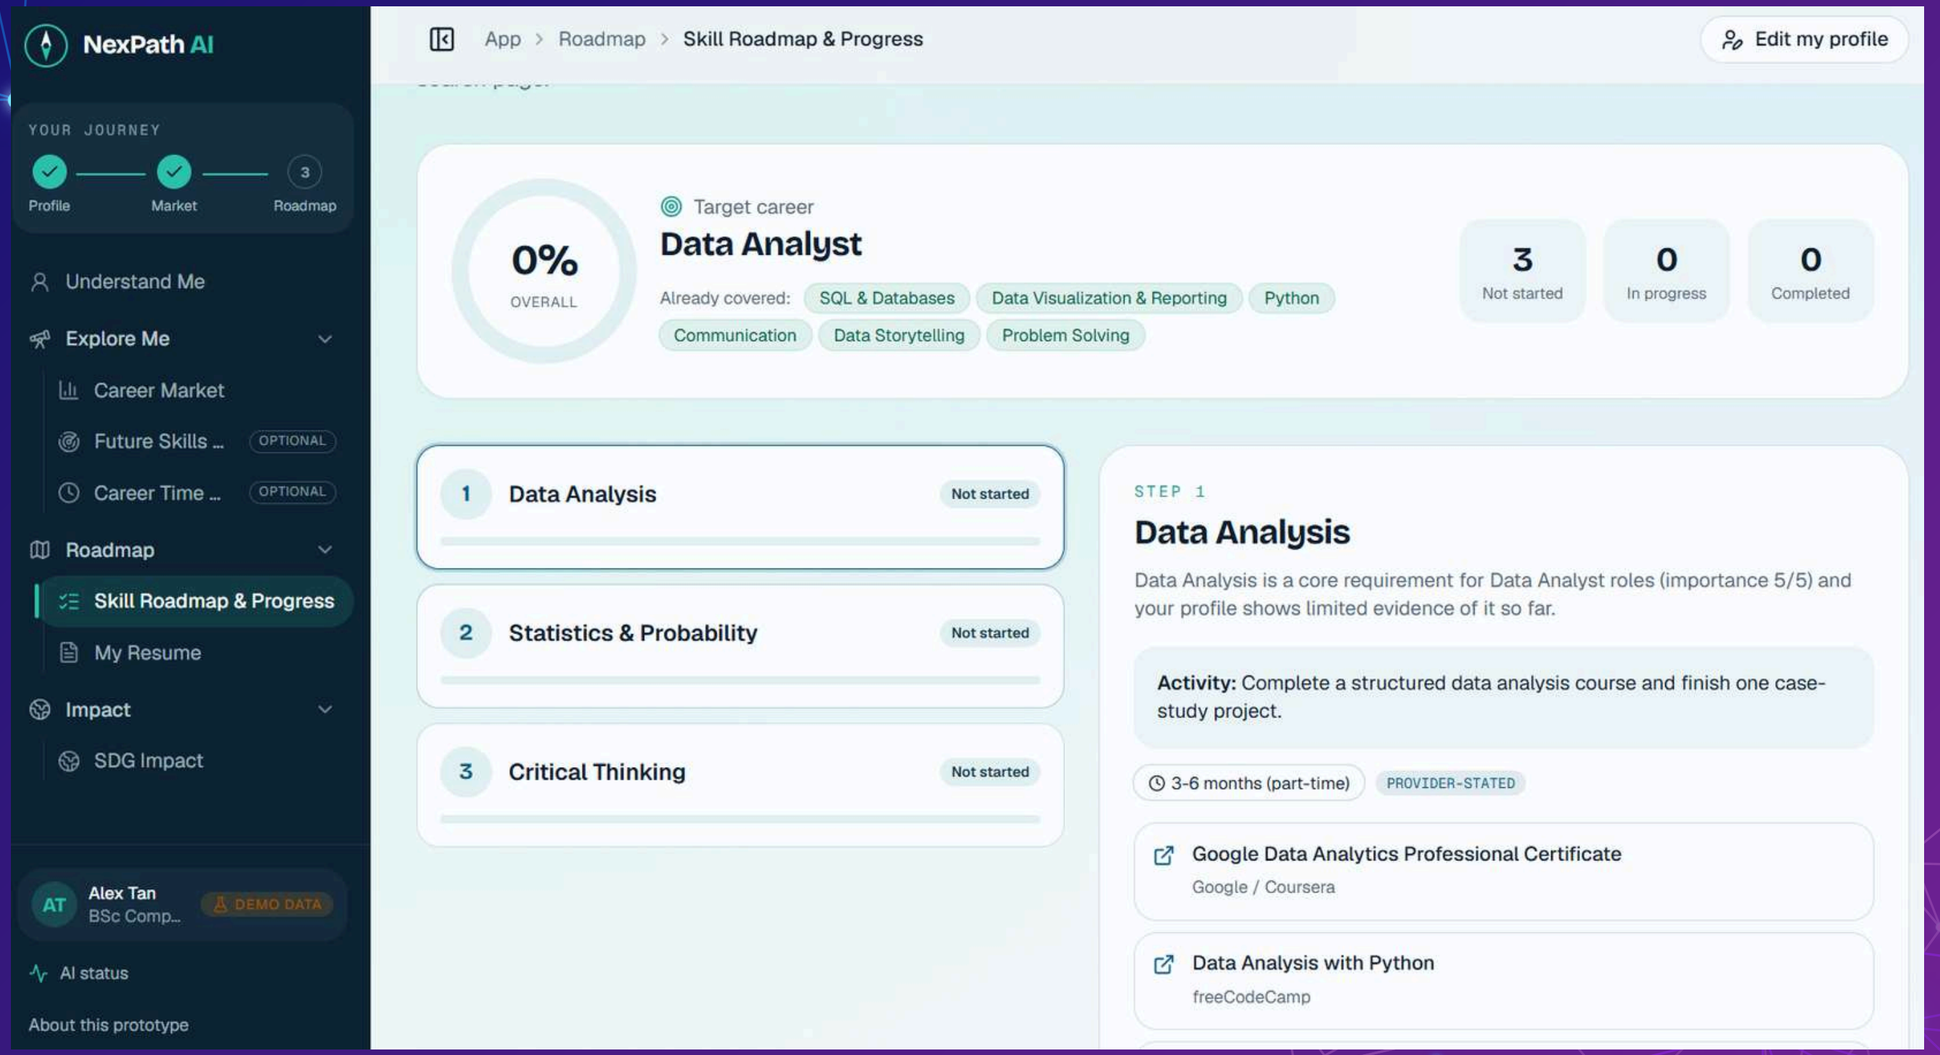

PROTOTYPE

STEP 5: Career Time Machine - one career, two possible furures

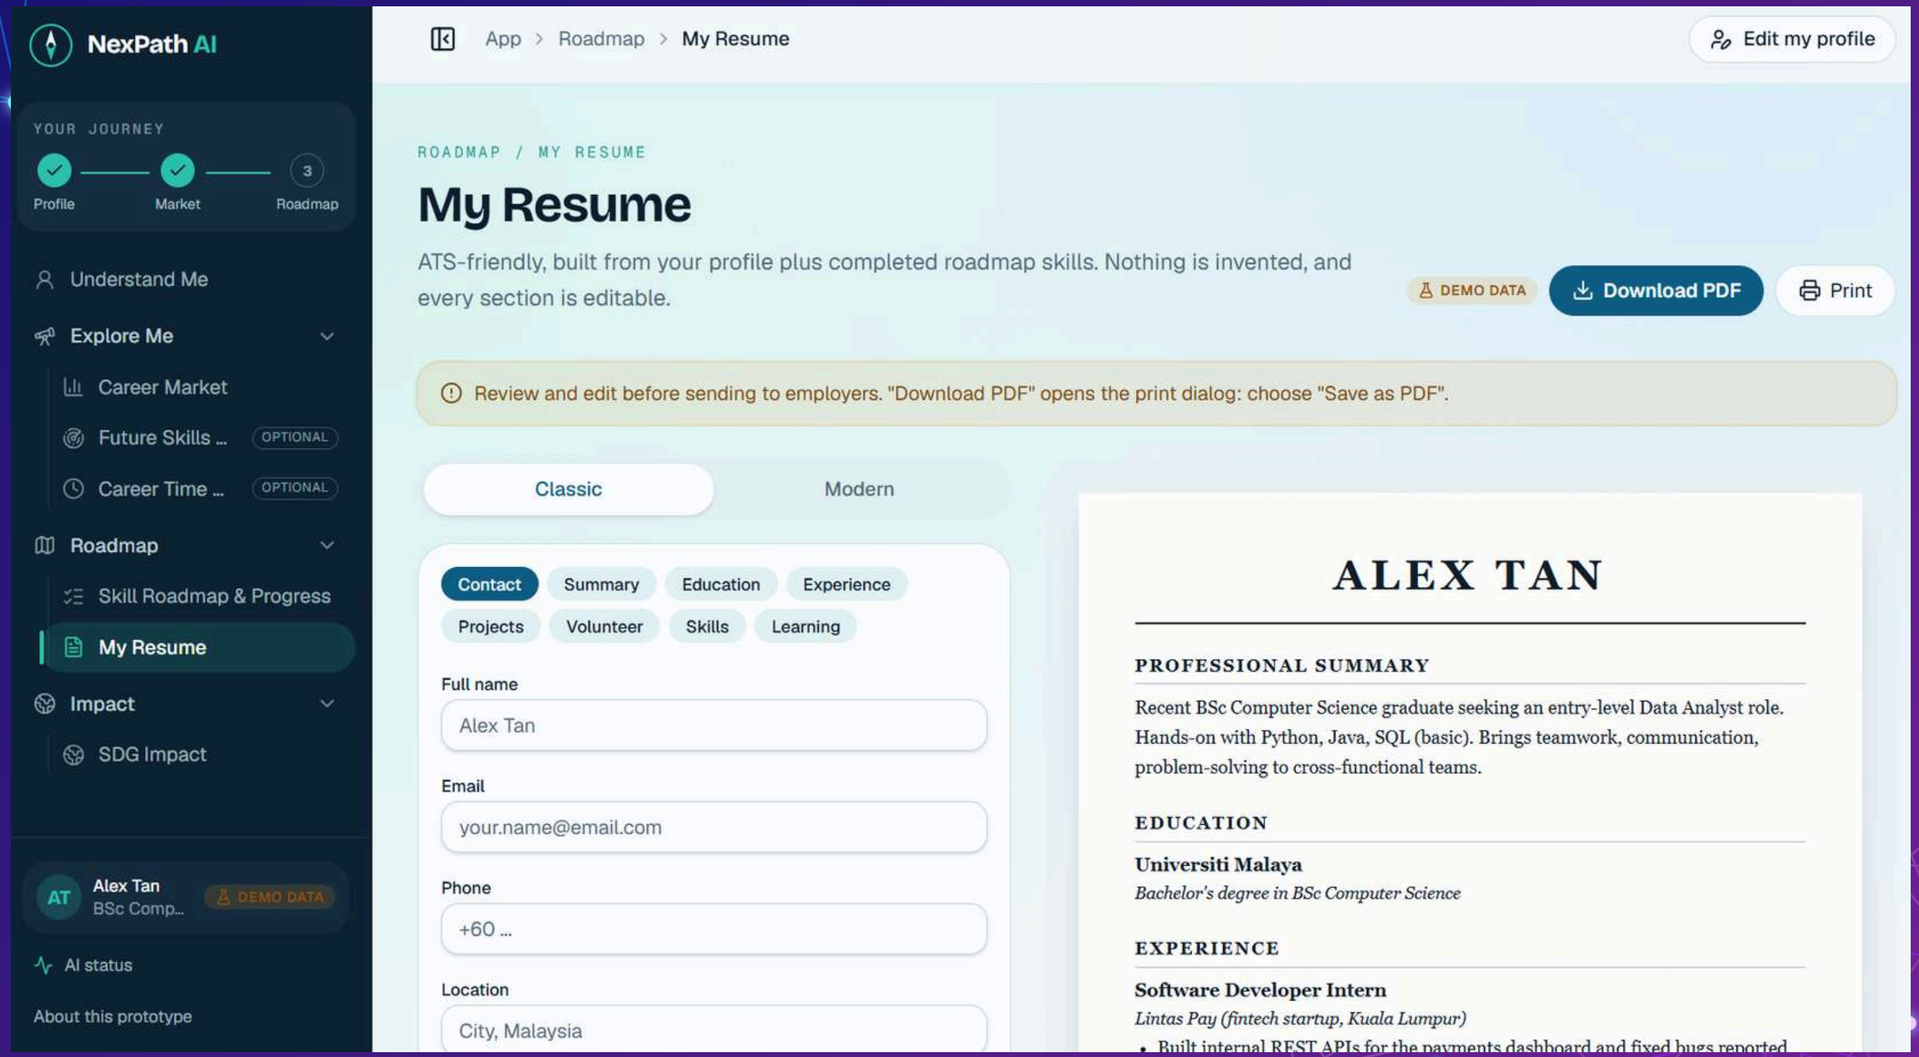

PROTOTYPE

STEP 6: Skill Roadmap and Progress - close skills gap with resources and track progress

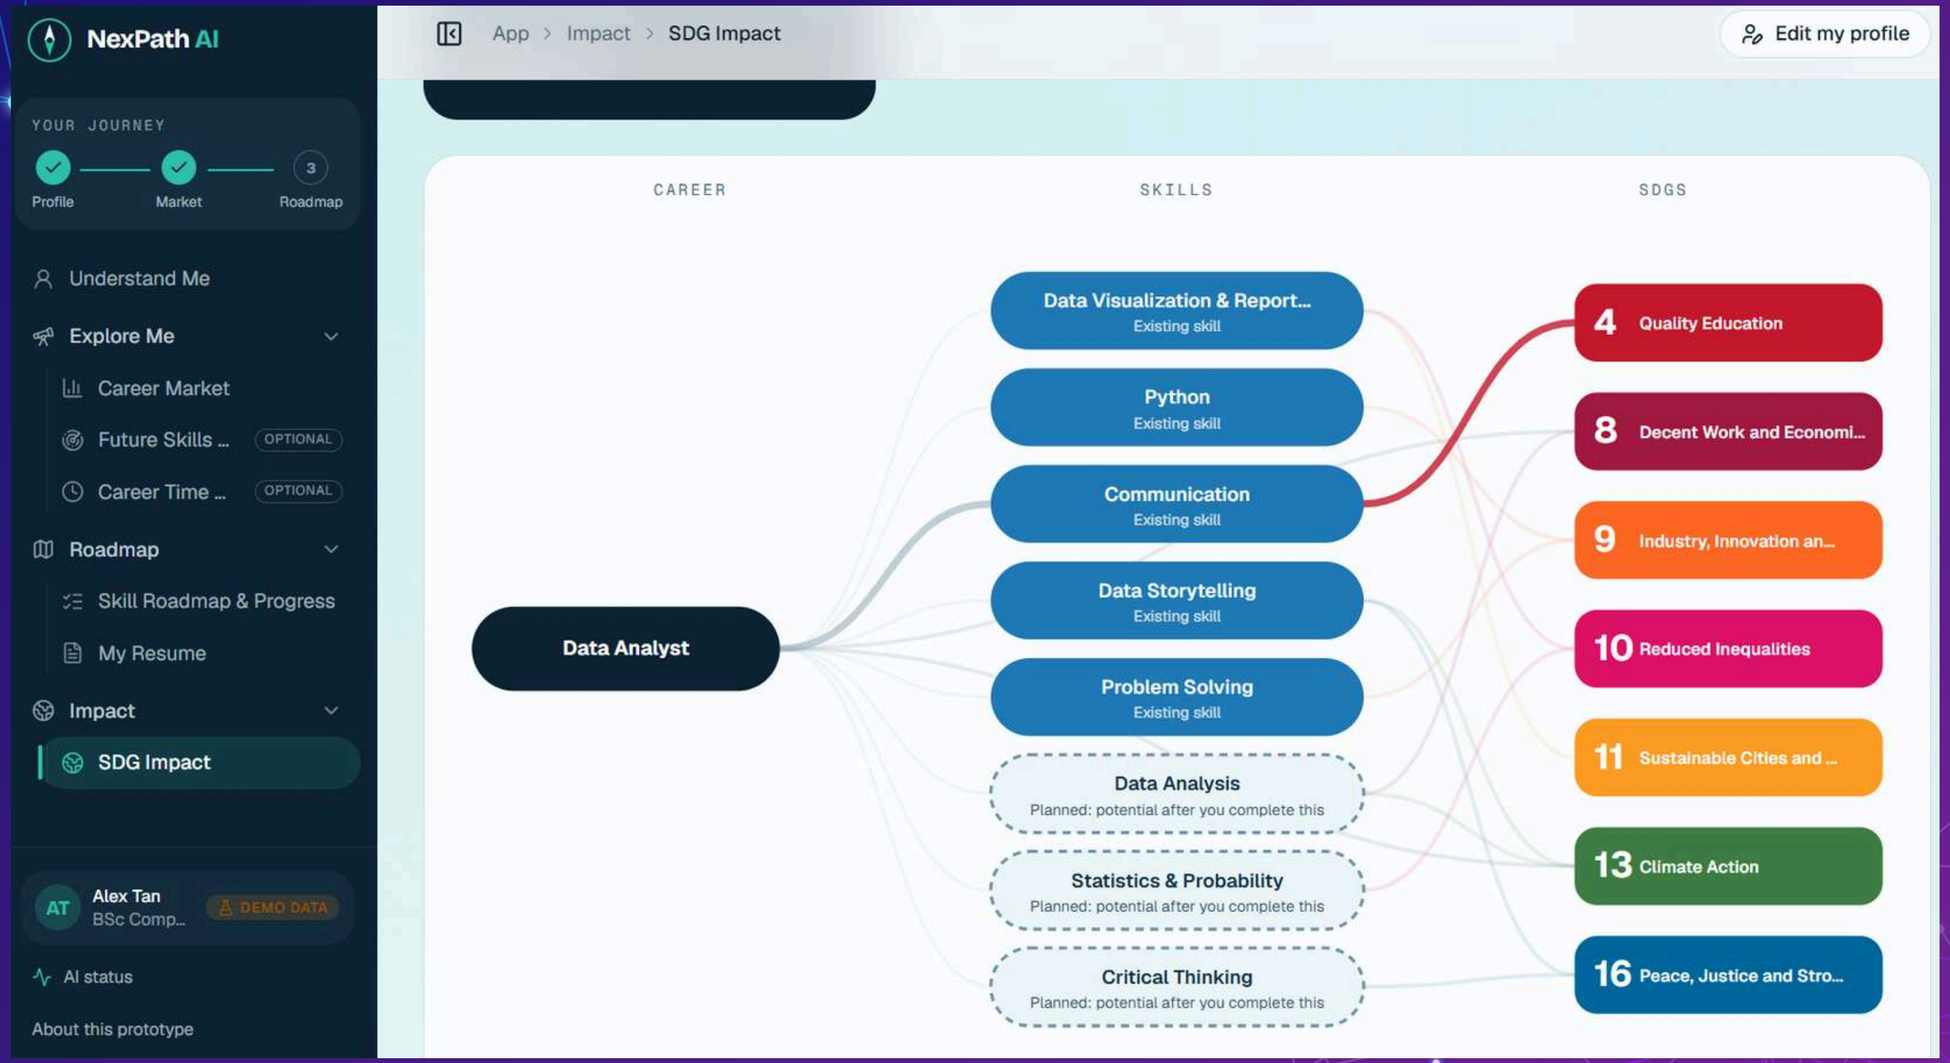

PROTOTYPE

- STEP 7: Resume Generator - all skill done recorded, resume automatically listed

PROTOTYPE

STEP 8: SDG mapping that changes what you see, not decoration

PRODUCT FEATURES

Future Skills Radar
Trends, graphs and field-based skill signals

Profile Intelligence
Editable profile from CV upload or quick form

Career Time Machine
Scenario comparison under gradual vs rapid AI adoption

Reskilling Roadmap
Sequenced learning actions and progress tracking

Explainable Role Match
Why a role fits, what is missing and to improve

SDG Impact View
Career-to-skills-to-SDG relationship visualisation

ARCHITECTURE & TECHNOLOGY

Frontend

Replit

FronReact + Vite + Tailwind

Backend

Replit

TypeScript Express API
(OpenAPI contract)

Data Layer

Skills, occupations,
trends, SDG mappings

JSON modelled on ESCO

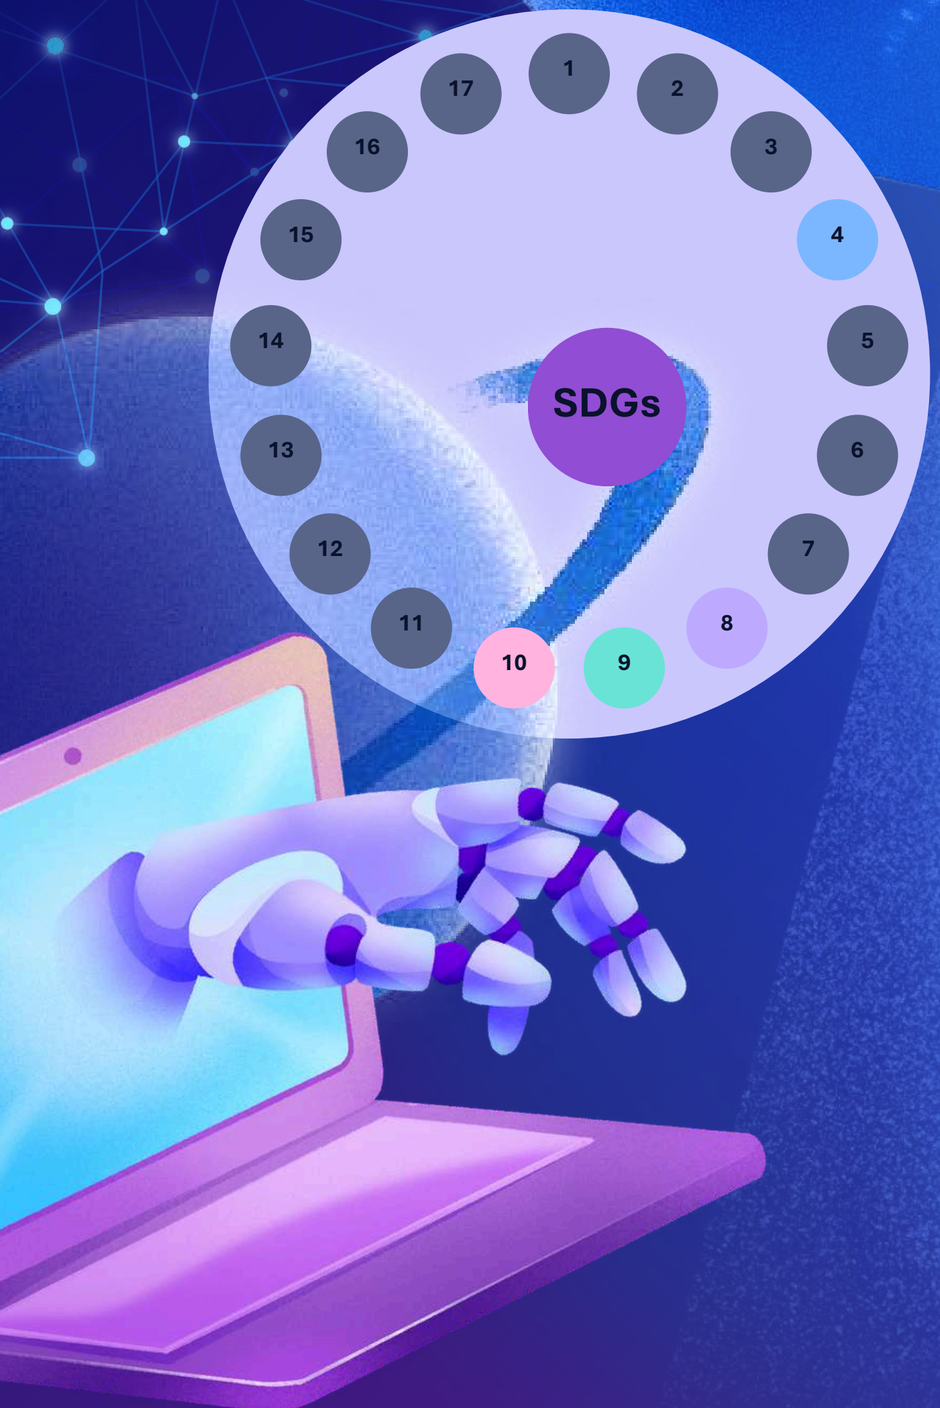

AI Inference

RunPod

all-MiniLM-L6-v2 embeddings
for semantic matching

IMPACT & SDGS

Expected outcome: from skills profile to ranked roles and a learning plan in minutes. Pilot targets (not results): ≥80% task completion across ≥10 test users.

Primary and supporting impact

- **SDG 8 Decent Work and Economic Growth**
  Supports career readiness and more informed pathways into productive employment.
- **SDG 4 Quality Education**
  Promotes lifelong learning through personalised and prioritised learning pathways.
- **SDG 9 Industry, Innovation and Infrastructure**
  Encourages technology-relevant capability building for innovation-driven roles.
- **SDG 10 Reduced Inequalities**
  Reduces information barriers through accessible, structured career guidance.

NexPath AI

THANK YOU

**The future of work is uncertain,
but career preeparation does not have to be.**
